

SE INS - THERMOFOIL THERMOFOIL INSULATION JACKET FOR SAFETY SHOWERS

Thermofoil Insulation Tube is completely closed cell, physically cross linked foam pipe insulation for excellent compression resistance.

Product is Pre Slit for faster fitting and insulation of a Safety Shower.

Flexible, tough and durable for most weather conditions.

Heat bonded reinforced aluminium foil. Also for use outdoors.

Unlike some other insulation materials, Thermofoil is unaffected by moisture over the long term. Due to the closed cell foam and foil facing, the water absorption of Thermofoil is extremely low and remains so throughout its service life.

Under normal conditions, the Thermofoil reinforced aluminium foil facing can withstand many years of UV exposure. However it can be compromised through the effects of salt water, chemicals or mechanical damage.

Supplied Fitted to Safety Shower as shown below.
